**Embrace the new standard
of high performance**

The Surestep Gauntlet Series excels in patient outcomes and preserves margin integrity.

PDAC- VERIFIED

THE GAUNTLET SERIES

The Surestep Gauntlet Series excels in patient outcomes and preserves margin integrity.

Surestep Gauntlet Series

The Surestep Gauntlet offers a superior approach to traditional custom leather ankle support systems. Our Orthosis is fabricated to deliver flexible comfort coupled with control. The combination of soft and rigid plastics allows for 3 unique versions to optimally treat severe (acute), moderate, or mild (early stage) conditions.

When compared to the traditional custom leather ankle gauntlet, patients and care providers appreciate that the Surestep Gauntlets are easier to fit, have a lower profile, are longer lasting, more hygienic, and waterproof. Finally, a superior alternative that offers a tailored solution for the entire range of patient needs, from early indications through acute stages.

BENEFITS

- » Custom Casts or Scans (STL or Captevia accepted)
- » PDAC-verified L-codes
- » Easily adjusted at fitting
- » Low profile
- » Easily fits in shoes
- » Hygienic
- » Waterproof/Easily Cleaned
- » More durable than leather
- » Options and colors available
- » Quick turnaround
- » 100% Guaranteed

Patient Solutions

Innovative lower-extremity orthotic solutions.

Product Design

Customizable, evidence-based approach.

High Margins

Low product costs and PDAC-verified L-codes enhance gross margins.
