

PDAC VERIFIED

The Stabilizer is more than a preventative option for adults experiencing stability and balance issues. It is a solution that restores confidence, proprioception, and function. With the risk of falling greatly reduced, you're free to re-engage with day-to-day activities.

It features a low profile cuff as well as a molded inner boot. This prevents skin breakdown and keeps the heel seated. And unlike other options, the Stabilizer allows greater sensory feedback through an open heel design.

INDICATIONS

Muscle weakness, ataxia, decreased balance response, gait abnormality, osteoarthritis (localized primarily in ankle/foot), arthropathy (ankle/foot), pain or instability of ankle/foot, mild drop foot, hemiplegia, Multiple Sclerosis

CONTRAINDICATIONS

PTTD, charcot foot, spasticity

NO CASTING REQUIRED

Significant time savings
4-day turnaround by measurements
