

DASS AFO

Dynamic, progressive stretching system for pediatric patients

Get the benefits of a dynamic stretching program for your pediatric patients with our new Dynamic Adjustable Stretching Strap (DASS) AFO. Each total-contact custom AFO corrects and protects fragile subtalar joint alignment. The AFO is lightweight, low-profile, and durable. It's lower weight and reduced bulk increase patient comfort and compliance.

An easy-release tension adjustment system improves home usability. Plus, clinicians can adjust plantar flexion and dorsiflexion limits to create custom stretching therapy plans.

Safety tread allows nighttime household walking without shoes.

Built-in goniometer and tension-strap markings make tracking progress easy.

Order AFOs with measurements OR cast.
