Leaps and bounds forward

At Surestep, we create custom orthotic solutions that help children live with confidence—from baby steps to huge leaps forward. With innovative devices, exceptional quality, and rapid turnaround times, we keep you and your patients moving. Our head-to-toe braces and trusted expertise support growth and mobility at every stage of development. Together, we're shaping a brighter, stronger, and more mobile future for each child.

01

Trusted Pediatric Expertise

Decades of clinical insight, purpose-built devices, and a reputation for patient success supported by over 2,000 clinics worldwide.

02

Reliable Service & Support

Warranty-backed reliability, dependable fit, and clinical education that empowers clinicians and care teams and supports patient development.

03

Speed without Compromise

Streamlined ordering and fast turnaround without sacrificing precision or patient outcomes.

04

Head-to-Toe Portfolio

From infancy to adolescence, our comprehensive portfolio grows with your patients and is built to meet real-world pediatric care needs with innovative designs and advanced fabrication offerings, like 3D printing.

Lower Extremity Orthoses

Our wide range of lower extremity orthoses are designed to support pediatric mobility and comfort, stabilizing children while still allowing for natural development. Custom built to move with kiddos, these devices support every step of a child's journey.

To make it easier to find the right device, our lower extremity orthoses are categorized by the level of support or control:

Dynamic Stability

These devices provide stability while allowing for flexibility/movement and address atypical tone. Patients are able to actively correct when cued.

Functional Support

These devices offer support and stability to promote function and address low/high tone. Patients are able to actively correct when cued.

Alignment Control

These devices provide maximum support and positioning with limited flexibility within the device and address high tone. Patients are able to actively correct when cued.

Cranial Remolding Orthoses

The Surestep Sprout3D™ Cranial Remolding Orthosis (CRO) is transforming cranial care with a cutting-edge 3D design that delivers precision, comfort, and efficiency. National cranial specialists developed Sprout3D by combining 10,000 data points and decades of clinical experience, leading to design breakthroughs that help ensure the best possible patient outcomes.

Sprout3D™
surestep

Innovative Design

Intentionally designed for comfort and ease of use, Sprout3D features a lightweight structure and first-of-its-kind hinge opening.

Clinical Efficiency

Sprout3D is fabricated in the USA with top-of-the-line 3D printing technology allowing for quick turnaround times and a precise fit requiring minimal modifications.

Individualized Care

Sprout3D features treatment-specific trim lines designed for plagiocephaly and brachycephaly.

Postural Control Orthoses

Surestep's spinal and trunk solutions provide the alignment and support children need to develop postural control and improve functionality without limiting movement. From the Dynamic Cervical Orthosis (DCO) to the Thoracic-Lumbar-Sacral Orthosis (TLSO), our solutions provide gentle, guided alignment for the head, neck, and trunk.

resources

Visit Our Website

We're dedicated to equipping clinicians with the essential tools to maximize their experience with Surestep products. For wear and care guides, the latest research and case studies, measurement forms, and additional resources, please visit our website at surestep.net.

Education

Deepen your understanding of our products and earn continuing education units (CEUs) by participating in our live, on-demand, and in-person courses.

Subscribe to Our Newsletter

To stay up to date on all things Surestep, including product information, discounts, and continuing education opportunities, subscribe to our newsletter.

How to Get Started

To become a Surestep customer, please fill out our Professional Provider Agreement.

We also offer an on-demand O&P Provider course covering everything you need to know about working with Surestep, including information on measuring, ordering, and fitting our devices.

Placing Your First Order

Once you're ready to place your first order, visit surestep.net/clinicians. You will find helpful resources, including order forms, LOMNs, case studies, and more.

Submitting an Order

To submit an order, complete a measurement form and send it to our Customer Service team. After we receive your order, we'll process it and schedule it for fabrication.

You can find order forms and patterns on our website.

Email completed forms to orders@surestep.net or fax them to 866.868.1890.

Scan the QR code to access our Professional Provider Agreement.
